

Pt.Talks

International and interdisciplinary discourse.

Lehre	Stegreif	Martin Bangratz
Master		Agnes Förster
SS 21		

The aim of this Stegreif is to engage in meaningful conversations about various topics in the area of planning theory and urban development with young scholars from a range of international institutions and disciplines. Participants will be invited to attend three Pt.talks, a new event series by Pt with the aim to foster a scientific and public discourse about current and emerging critical topics in urbanism. Within the guiding theme of global challenges for sustainable urban development, we see this format as an opportunity to explore new areas of research from different perspectives. This semester, the talks will center on transformative research in cities.

Each talk will feature a young researcher giving a talk on a specific topic and provide for informal, open discussion among all guests. The format can give students an opportunity to network across thematic and geographical boundaries, exchange feedback, and be inspired by new inputs and discussions.

Students attending this Stegreif will produce summaries of each talk, supplementing their own conclusions by relating them to each other and to general topics of planning theory.

introduction:
wednesday, 05.05.2021,
03:30 to 04:00 pm, Zoom

dates of the events:
wednesday, 19.05. / 16.06. / 07.07.,
05:30 to 07:00 pm, Zoom

examination:
friday, 30.07.2021,
12:00 am, Moodle

recognition:
1,5 ECTS
